

Fiducian Growth Fund

Monthly Report - July 2023

Fund description

The Fiducian Growth Fund has a large allocation to growth style assets and is diversified between managers and countries, utilising the Fiducian “Manage the Manager” system that aims to achieve superior returns with reduced risk.

Over the long term, the Fund is expected to generate higher returns than funds with a lower allocation to growth assets, but will also be exposed to capital losses when markets turn down.

The Fund is suitable for investors seeking good long term capital growth with possible short term volatility. The recommended holding period is at least 7 years.

Fund facts

Portfolio manager: Conrad Burge
ARSN: 093 543 241
APIR code: FPS0004AU
Benchmark: Morningstar Multisector Growth Median
Current fund size: \$328 million (July 2023)
Management cost: 0.99%
Total management costs: 1.08%
Application/Exit fee: Nil
Inception Date: March 1997

Fiducian Growth Fund

Monthly Report - July 2023

Market Commentary and Outlook

Economic data was largely positive in July, as inflation measures in both the US and Australia showed larger than expected declines, although current inflation rates remain above central bank targets. Additionally, US economic growth over the June quarter was better than market expectations, raising hopes of a so-called 'soft landing' for the US economy.

However, the global economy continues to face challenges. Manufacturing activity is still contracting in most advanced economies, consumer confidence remains low and employment data has been too strong (adding upwards pressure on inflation).

Overall, this backdrop was positive for markets. The broad US market (S&P 500 index) gained 3.1% and the Australian market (ASX 200 index) rose 2.9% for the month. The listed property sector gained 3.8%, and bonds also recorded a small positive return. Most commodity prices increased during the month, with the oil price rising by 16%.

Looking ahead, geopolitical risks, alongside elevated interest rates and slower economic growth this year, represent potential headwinds for markets. The International Monetary Fund (IMF) recently made a minor upgrade to its economic forecasts, with global growth now expected to be 3.0% in both 2023 and 2024. The IMF expects growth rates to remain slightly below long-term trend levels for some time. However, in broad terms, share markets continue to appear more attractive than most other investment opportunities.

Fund Commentary

The Fund outperformed its benchmark in July, returning 2.5% compared to the median manager return of 2.0%. Over the 12 months to the end of July, the Fund generated a return of 7.5%.

Most asset classes finished the month higher, with gains seen in listed property, Australian shares and International shares. Bonds and cash generated small positive returns.

The Fund has a neutral exposure to equities and property, as relatively attractive valuations are offset by rising interest rates and a slowing economy. Additionally, an overweight position is still held in cash relative to bonds, although this position has been reduced in recent months.

In the Morningstar Multisector Growth Category, the Fiducian Growth Fund returns were ranked 56th out of 173 funds over one year, 15th out of 157 funds over five years, and 2nd out of 142 funds over the ten year period to 31 July 2023.
